About E-Cinema project

The aim of the project – to modernize the activities of the E-cinema information system by creating and developing advanced electronic services based on it, adapting the system to mobile devices and establishing a National Centre of Competence for the Digitization of Audiovisual Heritage.

The equipment for digitization, digital restoration, storage and online presentation of films was upgraded during the implementation of the Project. Currently, LCVA is the only place in Lithuania digitising films in 4K resolution. During the Project, 229 hours of film content stored in the archive was digitized and made available on the Internet, including important events in Lithuania's history in 1988–1992.

On the updated portal, www.e-kinas.lt, users have the opportunity to search for descriptions of all films held by LCVA and view digital images, taking into account the restrictions on copyright. On the updated portal, users have the opportunity to search for descriptions of all films held by LCVA and view digital images, taking into account the restrictions on copyright. The modernized E-cinema information system provides six new electronic services:

- Obtain permission from the copyright holder/administrator
- Order and receive a digital photo of a stop shot
- Organize a virtual exhibition/collection

High definition digital copy of the film

Service introduction

To use this service, register on the E-Cinema website.

How do I order a high-definition copy of a selected film?

Do a search and select a movie.

If preview is not available, the film may be protected by copyright (check the information by clicking on ©) or be prepared for publication.

Write a letter to the copyright holder – click on the link provided to the film you are interested in or use the electronic service **Obtain permission** from the copyright holder/administrator. Add the received permission to the order.

Watch the film in low resolution and make sure it meets your needs. Choose the movie settings. Save it in your account, and place an order to make a high-definition digital copy of the film or a snippet of it.

Is the service paid?

According to the *list of paid services provided by the State Archives and their price list*, the production of a high-resolution digital copy of a film is a paid service. You will be able to pay for the service immediately on the E-cinema website, using electronic banking, a payment order, or directly at the Lithuanian Central State Archive box office.

How do I get an order?

The ordered copy of the high-definition film will be prepared and submitted in the manner of your choice – online, by mail or in the Archive.

Can't order the service? We will be happy to help you! Call us - +370 659 02269, or write - paslauga.ekinas@archyvai.lt

Possibility to create a frame or snapshot from film by using photocamera sign

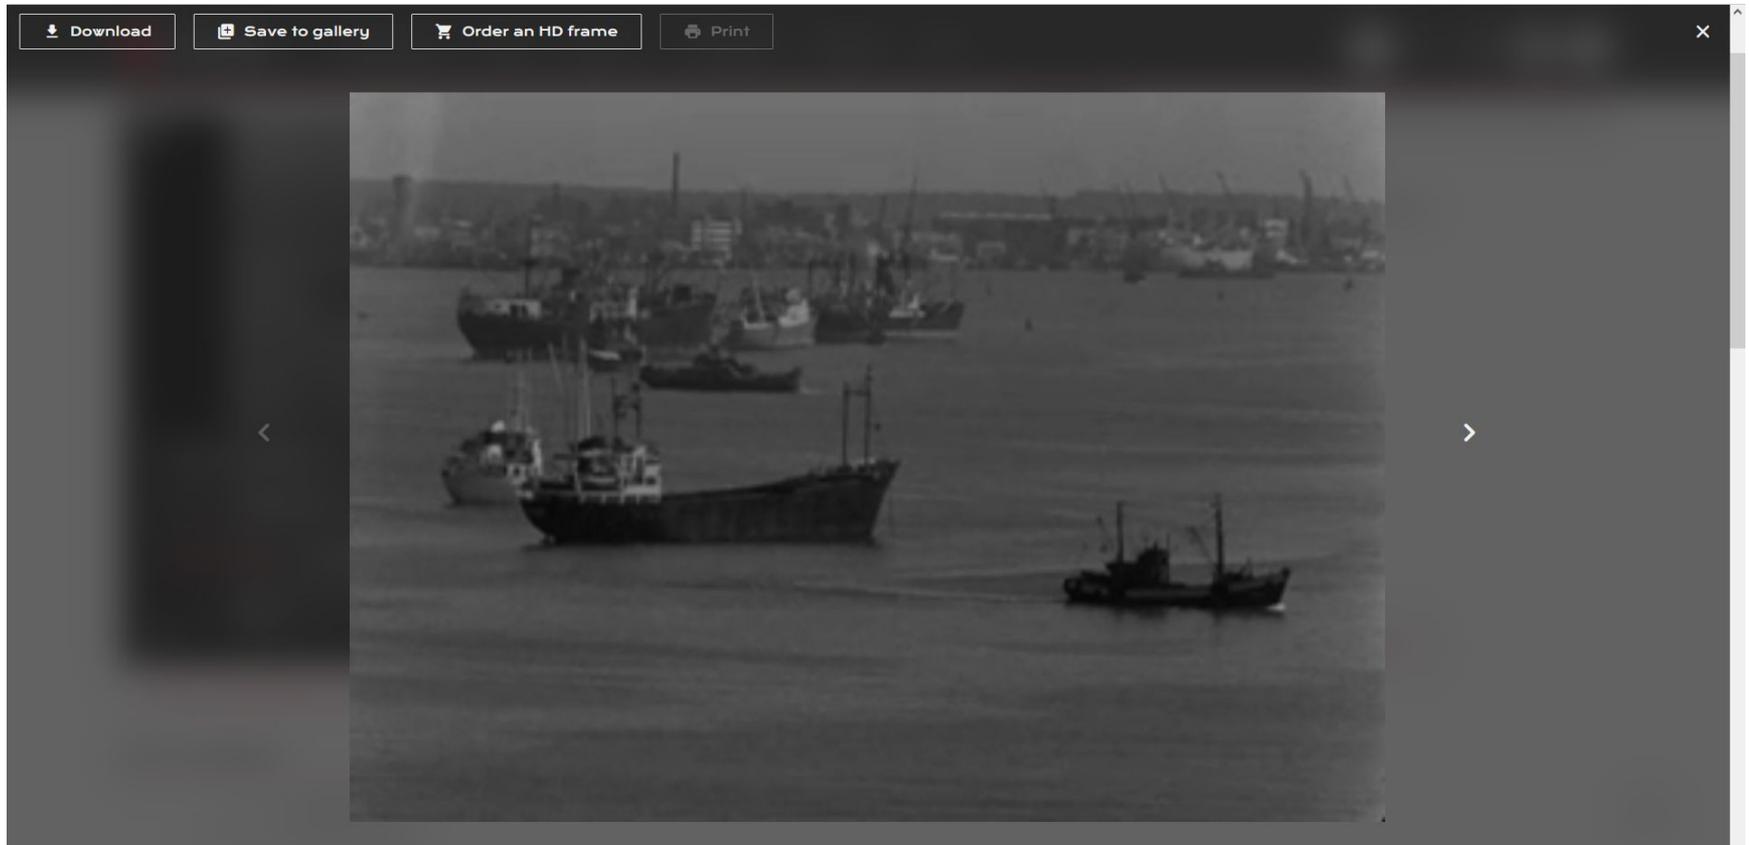

The screenshot displays the E-KINAS website interface. At the top, a dark navigation bar contains the E-KINAS logo (a red circle) and the text "E-KINAS". To the right of the logo are menu items: "About Project", "News", "Movies" (with a dropdown arrow), "E. Services", "Contacts", and "FAQ". Further right are icons for search, language selection (EN), a person icon, an envelope icon, and a profile icon.

The main content area features a video player on the left showing a black and white film of a harbor with many fishing boats. A "Create a snapshot" dialog box is overlaid on the video, showing a time selection of 00:00:14:19 and buttons for "Create" and "Cancel". Below the video player is a progress bar showing 0:14 / 15:49 and standard video controls (play, volume, camera, scissors, full screen, and a menu icon).

To the right of the video player, there is a text description: "The film is about Estonian sailor Alfredas Oya, who worked in the Lithuanian fishing fleet." Below this, the "INVENTORY NUMBER" is listed as "2045-35" and the "DIRECTOR" as "Marcinkus Adakris". At the bottom right, there are buttons for "0 comments", "Save", and "Share".

Some e-services that can be ordered directly through the website:

- High definition Digital copy of the film
- Digital copy of still frame
- Permission to use film which is in copyright
- Cinema live

Some challenges:

- The website itself is totally on cloud.
- All films metadata were transferred automatically from the old system, so there are some mistakes and empty fields.
- Films can be published automatically, but we can't do this because of the copyright.
- We make English translations by ourselves

Website www.e-kinas.lt: new possibilities and challenges for re-use of audiovisual heritage

- The Archive is promised to get some financing from Lithuanian government for maintenance and sustainability of the website
- We are opened to new ideas and thoughts what can also be done and what functionalities could be improved
